HOSPITALITY

Unique Digital Applications

For today's technology savvy guests, Hospitality Brands must include next-gen solutions that instantly captivate guests in a dynamic and engaging way. Brands must provide digital applications with dazzling visuals, stimulating infotainment, unique property content that is not always publicly accessible, and even reservation check-in capabilities. Brands' designs should also never be limited to only one interface layout, or to vendor content control. Each brand should be free to stand out with their brand's well-recognized uniqueness and appeal.

- Interactive Concierge
- Live Feed Transportation
- Wayfinding
- Video Walls
- Employee Communications
- Room Boards
- Mobile Solutions

Our All-In-One Total Solutions Seamlessly Include:

- Dazzling visuals and stimulating infotainment.
- Unique content that is not always publicly accessible.
- Reservation check-in capabilities
- Emergency and announcement content updater.
- Interactive property 3D maps with total editing control.

22MILES
