

HEALTHCARE

Unique Digital Applications

Whether it's a hospital campus, off-site clinics, or medical offices, digital applications improve your patient and visitor experiences. Foster a more vital and visually informative facility for your community and staff. Ensure your visitors are informed in real-time and won't lose their way while going to appointments or checking in on loved ones. Digitally communicate important messages to staff. Create a more inviting experience for all with video walls and digital signage solutions through the drag-and-drop platform of 22Miles.

SECURE MOBILE CONTROL

Create a touch-less, more hygienic experience when users speak their choices to an interactive touch or non-touch screen.

MAP IT NOW

Receive instant turn-by-turn directions through SMS, QR codes, emails and have the wayfinding on the go.

SMART PATHWAY

Intelligent built-in wayfinding algorithm that auto-generates directions based on shortest path & ease of accessibility.

ASSET TRACKING

Integrate with RTLS hardware components to locate carts, wheelchairs and other hospital equipment in real time.

WHEELCHAIR ACCESS

Disabled users can tap an ADA button on the screen or app to activate programmed accessible routes.

VISITOR/PATIENT CHECK IN & ACCESS CONTROL CAPABILITIES

Including badge integrations or check-in questionnaire. Add Virtual Receptionist feature option for a safer and more engaging human interaction experience.

CUSTOMIZED TEMPLATE DESIGN

The PublisherPro.AIOT suite for novice user controls and simplified day-to-day editing with quick edit settings and work flow options.

DONOR & PATIENT RECOGNITION APPLICATIONS

Foundation and marketing can create & manage a more immersive experience from the lobby to waiting rooms and throughout the healthcare facility.

Drive Communications To Staff, Patients & Visitors From One Platform Interface.

- Wayfinding & Directories
- Education & Events
- Waiting Room Signage
- Donor Boards
- Menu Boards
- Alerts and more!

WAYFINDING CONTENT

CAMPUS VS. INTERIOR 3D WAYFINDING

All directions are based on shortest path and ease of accessibility using our Smart Pathway Algorithm

DIRECTIONAL WAYFINDING

Directions are automatically generated once a destination is selected.

SEND DIRECTIONS TO MOBILE

Send directions to a mobile phone via QR code, text or email.

3D INTERACTIVE WAYFINDING

Create better physical orientation through 3D floor plans that are 100% in-house editable with PublisherPro.AIOT map module.

COMMUNICATION CONTENT

PATIENT / DONOR DESIGN

Thank all your donors, showcase grateful patient notes, and leverage eye appealing recognition content experiences.

INFORMATIONAL CONTENT

Quickly customize news headlines, weather reports, emergency alerts, and promotions through a simple to use application.

BUILDING / PHYSICIAN DIRECTORY

Dynamically update tenant, physician directory listings through automated data integrations or through a simple quick edit setting controls.

VISUAL COMMUNICATION TEMPLATE

Tell a better story with animations, transitions and built-in widgets leveraging the 22Miles template center.

SIGN UP OR SURVEY DESIGN OPTIONS

Patients can sign up to receive specific notifications and or information.

INTEGRATION

Integrate with your health system applications such as EPIC and Alertus, or Everbridge and more for seamless data interface.

Scalable, Centralized Platform for all your Digital Signage Needs
