

# Healthcare Solutions

## Challenges

Hospitals and healthcare campuses often span multiple buildings and floors, making navigation difficult for patients, visitors, and staff. At the same time, healthcare organizations face mounting pressure to improve patient communication, deliver better outcomes, maintain high ratings, and support overextended staff, all while coordinating messaging across departments and teams.

## How 22Miles Solves Them

22Miles provides healthcare systems with an integrated digital platform that simplifies navigation, unifies communication, and enhances the care environment. From ADA-compliant wayfinding and mobile navigation to dynamic digital signage and centralized content management, our solutions are designed to reduce confusion, ease staff workload, and improve patient satisfaction. With flexible tools for content flow control, hospitals can ensure that every department delivers accurate, timely content without added complexity.

## Digital Signage

- Enhance the patient experience with health tips and wellness advice.
- Integrate with leading scheduling systems, social media feeds, and more for dynamic, automated content.
- Support interactivity with touchscreens and mobile accessibility with Carry2Mobile for seamless communication across devices.

## Interactive Wayfinding and Directories

- Industry-leading 3D interactive wayfinding software with ADA-compliant routing, ideal for multi-floor and complex hospital layouts.
- Mobile wayfinding empowers users to transfer maps to their mobile devices via QR code for on-the-go navigation.
- Includes clear directories of staff and locations, static campus maps for quick reference, and simple arrow indicators to guide users to their destinations.

## Space Booking

- Integrates with leading calendar software and is hardware agnostic for flexible deployment.
- Streamline room scheduling and staff communication.
- Displays real-time updates on room availability across doctors' offices and patient rooms.

## Donor and Video Walls

- Create a modern, high-tech focal point with large-format displays that support videos, animations, and dynamic content from multiple sources.
- Touchscreen capability enables rich, interactive experiences, such as exploring donor stories, doctor achievements, or upcoming events.
- Easily update content to publicly recognize staff members, display announcements, and engage visitors with QR codes for on-the-spot donations.

### Healthcare Solution Benefits:

- **Content Flow Control:** Centralize management for scheduling and distributing targeted content across departments and devices.
- **ADA Compliance:** Ensure accessible content and navigation with features like ADA routing and accessible design standards.
- **Mobile Solutions:** Extend digital signage and wayfinding to personal devices for convenient, on-the-go access and enhanced user engagement.
- **Emergency Alerts:** Seamlessly integrate with all major emergency systems to deliver real-time, hospital-wide safety notifications.
